So you've always been great with numbers and analytics. And now you're considering how to make the most of those skills you're rightly proud of.

Sales & Trading is heavily dependent on the use of mathematical and quantitative technique, so we place a great emphasis on attracting people to the firm who have very strong mathematical and analytical skills.

Our Markets Mathematical Finance Programme gives you the opportunity to take up placements or Full-Time positions in three different areas: Quantitative Analysis; Structuring and Exotics Trading. So if you are about to get your PhD or a Masters Degree in a mathematical discipline (e.g. Mathematics, Physics, Chemistry, Engineering, Computer Science, Finance), come meet us for our Presentation and Reception to find out first-hand where Citi can take you.
